

Eckhard von Keutz

Dr. Eckhard von Keutz, Senior Expert Translational Sciences.

Former Senior Vice President and Head Translational Sciences, Bayer AG, where he directed all preclinical and early clinical development functions

Pioneering and dynamic professional adept at collaborating with both public and private sector partners, NGOs, CSOs, and through R&D networks to drive global medical innovations, playing active and critical role in delivery of non-clinical safety studies and pre-clinical and early clinical development activities.

Proven track record establishing innovative strategies that meet project and regulatory requirements whilst supporting development, implementation, maintenance, and monitoring of quality systems for all studies and activities to ensure compliance.

Demonstrated expertise in key project directorship within multi-disciplinary R&D environment coupled with impeccable record of successful delivery.

Substantial experience managing international business relationships with external project partners and service providers bolstered by knowledge and in-field experience managing global multi-cultural teams and expert ability to lead and motivate teams for optimum performance.

Offering exceptional, clear, systematic thinking, demonstrating strong judgement and problem-solving competencies.

Significant experience conducting a broad range of toxicological studies coupled with expertise in designing preclinical/toxicological testing strategies, regulatory expertise and proficiency in toxicological risk assessment and risk management.

Chairman of the Advisory Board of the Fraunhofer Institute of Toxicology and Experimental Medicine (Hannover, Germany); Member of the Executive Council at Center of Healthcare Innovation; Member of the Advisory Committee for Pharmacologically Active Substances and Veterinary Drugs of the German Federal Institute for Risk Assessment; Member of the CAAT Advisory Board (Europe); Former member of the Scientific Committee (ECETOC)
